

## UL508A: LET'S GET WITH IT!

**Don Lavrenz**  
**Tim Thorn**  
ABSOLUTE AUTOMATION  
SYSTEMS, INC. (AASI)

Tim and Don's 2004 presentation on UL508A to the luncheon guests of a major component manufacturer received high ratings, and attendees gained a clear understanding of how to meet the new standard. However, nearly 2 years after updates to UL508A went into effect, Tim and Don are still seeing many non-compliant (and some dangerous) designs cross their desks.

The good news is that adopting the new UL508A standard is straightforward. In this updated presentation, you'll learn:

- Definitions, Labeling Requirements, and Methods to Determine Short Circuit Current Ratings (SCCR).
- How UL508A is manifested in the NEC.
- Which markets absolutely require meeting UL508A.
- Safety issues.

**Make your commitment to UL508A...**start by joining your colleagues for this clear, quick presentation and a tasty box lunch!

**TUESDAY, FEBRUARY 12, 2008**

**Place: Absolute Automation Systems, Inc.**

N56 W24842 Corporate Circle • Sussex WI 53089
