Absolute Automation Systems, Inc. offers a wide variety of custom sublimated products for your school, organization or business. Perfect for fund-raising, awards, gifts, promotions, name badges and signs.

Through the use of digital technology, sublimation is perfect for logos, photos, clip art or other images. Once an electronic design is created it can be used to produce a single item or many of the same design.

Here's how it works: With heat and pressure, the sublimation ink is converted directly from a solid to a gaseous state penetrating the sublimatable substrate to create permanent, durable full-color images - unlike other printing/heat transfer methods which apply color only to the surface. The result with sublimation is rich, vibrant color on a durable product that is resistant to stains and scratches.

No minimum quantities, order as many or as few as you need!
